

## WHAT CAN WE DO?

**Spread the word.** The more people learn about Medicare for All, the more sense it makes. Educating ourselves and helping to educate others will create the broad bottom-up support that has been responsible for every major victory for working Americans.

**Call & write your Reps** and demand that they support **H.R. 676**: “The Expanded & Improved Medicare For All Act” No one who does not support getting better and more comprehensive healthcare for their constituency should win an election.

**Join an organization** that supports Medicare for All: Physicians for a National Health Program, National Nurses United, Our Revolution, and Democratic Socialists of America are just a few of the groups fighting for a better future for American Healthcare.

**Testify.** Revolutionary changes need human faces and human stories. If you or someone you know has been strongly affected by access or lack of access to affordable healthcare, we want to lift up your voice. Speak to one of our members or email: [info@miamdsa.org](mailto:info@miamdsa.org)

## BEYOND

**Medicare for All** will be won through sustained struggle and sacrifice on the part of **working people**. When it is achieved we can celebrate, but we cannot become complacent.

The moment we consider our fight has been won and turn to the next task in our busy lives, professional lobbyists go to work eating away the **hard-won gains of workers** to serve the narrow interests of capital.

To ensure our victories are lasting we need a **political revolution** that permanently eliminates the ability of capitalists to buy our politicians, **democratizes the economy**, and permanently dismantles structures put in place by the capitalist class to turn workers against each other: sexism, racism, homophobia, and all forms of religious bigotry.

Democratic Socialists of America is building power to win a future of greater **liberty, equality, & solidarity**.

Many residents of South Florida suffer from lack of access to healthcare. Those without coverage are among the most severely affected by the failures of U.S. healthcare.

We all know someone whose *life and health* hang in the balance as our elected officials hide their heads in piles of lobbyists' cash and refuse to acknowledge that healthcare is a human right, and that **Medicare for All** is the only way to ensure we join the rest of the developed world in enjoying it.

**Medicare for All** (also called “single-payer”, as one accountable public agency finances medical costs for all) has been a goal of reformers for more than a century. Relentless lobbying from the very profitable insurance industry has so far limited its reach to the elderly and chronically ill.

Now, with **27,000,000** Americans left *uninsured* under the ACA, and **24,000,000** more *threatened* by a bought congress, people across the country are finding their voice and demanding, as one, their right to healthcare.

Other developed countries have implemented single-payer systems with great success, and virtually every other highly developed country has found a way to assure *all* their citizens have access to healthcare. The moment for the United States to join them is now. Medicare for all is the way to do it.

## **MEDICARE FOR ALL**

Simply: *all* residents of the U.S. covered for all medically necessary services:

*doctors' fees, hospital fees, preventive care, long-term care, mental health care, reproductive care, dental, vision, prescription drugs, & medical supplies.*

Funded by a modest, progressive tax and by the *huge savings* to be had by remaking our horribly complex and fragmented for-profit system.

***We already pay enough for Medicare for All, we just don't get it!***

No premiums, no deductibles, no co-pays. Just essential care when your family needs it.

Being released from the control of insurers, patients will have their choice of physicians and hospitals.

## **MIAMI DSA Healthcare Working Group**

The Healthcare Working Group seeks to:

- Raise consciousness within Miami-Dade County about the benefits of socialized medicine and the inherent failings of market-based healthcare.

- Connect members of the public in need of healthcare with free clinics and providing volunteer support to free clinics to support their activity.

- Support the efforts of healthcare workers' unions involved in advocating for universal healthcare while also encouraging other healthcare workers' unions to get involved.

Email **[info@miamidsa.org](mailto:info@miamidsa.org)** to get involved.
