

Capitalism?

Wrong With

What's

We are a multi-tendency organization which requires no background knowledge, and we have no purity tests - all are welcome. Join us!

There are lots of ways to get involved. We currently have many different committees and working groups focusing on important issues such as: homelessness, health care, criminal justice, and socialist feminism. We have book clubs, happy hours, educational events, organize panels, do community service, and show up to support our allies!

Check out @miamidsa on Twitter, Facebook, and Instagram. Email: info@miamidsa.org

How can I get involved?

Capitalism isn't broken It's fixed

Capitalism is a rigged system designed to funnel wealth to a tiny elite. Their wealth is a result of exploiting our labor and our planet's resources.

Since the 1970s we've been told over and over the lie of trickle-down economics: if we cut taxes for the rich then it will create jobs and we all benefit.

Who is DSA?

As socialists, we believe that the only sustainable and just approach is to replace capitalism—a system that disregards the well-being of people and the planet—with a system designed to promote the prosperity of the many rather than the few.

Capitalism and true democracy are not compatible. Democratic socialism means the people have control over economic issues, along with political issues.

We are the fastest growing political organization in the United States of America and part of a growing international socialist movement that has empowered the likes of Bernie Sanders, Jean-Luc Mélenchon, and Jeremy Corbyn. Since the 2016 election, our organization has grown enormously, more than five hundred percent! We currently have more than 20,000 members. But... we need you!

Under a healthy democracy, people rule. In reality, banks, financial institutions, and corporations have amassed more power than the government itself! Their decisions impact us all, but no one elected them and they are not accountable to anyone. Their only motivation is their bottom line.

Economic and political decisions which affect the lives of ordinary people should be under popular control.

Capitalism limits democracy because the economic elite can buy power that should be in the hands of the people.

What is Democratic Socialism?

But how's that worked out for US?

The ruling class has been fighting class warfare against us: destroying the environment, expanding the prison-industrial complex, cutting public education, slashing social programs, and declaring war on unions

As the **rich get richer**, we work harder while increasingly many of us struggle to get by.
