

Since the '70s we've been told over and over for the rich then it will create jobs and we all benefit.

Capitalism is a rigged system designed to funnel wealth to a tiny elite. Their wealth is a result of exploiting our labor and our planet's resources.

How can I get involved?

There are lots of ways to get involved. We currently have many different committees and working groups focusing on important issues such as: health care, mutual aid, political education, electoral politics, and communication & outreach. We have reading groups, do community service, organize political actions, host social events, and show up to support our comrades!

We are a multi-tendency organization which requires no background knowledge, and we have no purity tests - all are welcome. Join us!

Check us out @miamidsa on Facebook, Instagram, and Twitter. Email: info@maildsa.org or find us at www.miamidsa.org

What's Wrong With Capitalism?

What is Democratic Socialism?

As socialists, we believe that the only sustainable and just approach is to replace capitalism—a system that disregards the well-being of people and the planet—with a system designed to promote the prosperity of the many rather than the few.

Capitalism and true democracy are not compatible. Democratic socialism means the people have control over economic issues, along with political issues.

Who is DSA?

We are a highly committed organization of activists, not a political party. Through campus and community-based chapters, DSA members utilize a variety of tactics, from legislative to direct action, as tools in the fight to empower working people. Since the 2016 election, our organization has seen enormous growth, more than five hundred percent! We currently have more than 30,000 members. But... **We need you!**

Under a healthy democracy, people rule. In reality, banks, financial institutions, and corporations have amassed more power than the government itself! Their decisions impact us all, but no one elected them and they are not accountable to anyone. Their only motivation is their bottom line.

Economic and political decisions which affect the lives of ordinary people should be under popular control. Capitalism limits democracy because the economic elite can buy power that should be in the hands of the people.
